

Are you tired of resin restorations that don't look as good as you think they should? In this one-day, limited attendance hands-on and live patient workshop we will show you why most resin technology is not able to achieve a natural look and which resin technology is designed to mimic the light properties of natural enamel. Learn how to create beautiful resin restorations and veneers, easily and predictably, using the ENA HRi composite system from Micerium.

HANDS-ON WORKSHOP:

**Limited to six attendees.
All materials supplied.**

Please bring:

Magnifying loupes and headlight if you have them. Your preferred high and low speed handpiece, gloves and masks, and composite placement instruments for the clinical portion of the session. Dentists will team up in pairs of two for the patient portion. Patients will be supplied unless you prefer to arrange your own.

COURSE INSTRUCTOR:

Christopher Tsang, D.D.S., B.Sc.

Christopher Tsang, D.D.S., B.Sc. is a 1988 graduate of the University of Toronto, Faculty of Dentistry and Faculty of Arts & Science. He began his professional career as Head of the Dental Department at Moose Factory General Hospital in northern Ontario. After associating briefly in private practices in the Northwest Territories and GTA, he took over a long-time practice in Aurora, Ontario and proceeded to introduce new techniques and technology. Over the years, Dr. Tsang has incorporated high magnification dental operating microscopes, hard and soft tissue lasers, digital radiography, CEREC CAD-CAM ceramics, resin and porcelain veneers, implant placement and prosthetics,. His BioSafe approach has resulted in his restorations and prosthetics being over 95% metal-free for over 15 years. He enjoys attending continuing education courses and study clubs and sharing his knowledge and enthusiasm with other dentists.

DATE AND TIME:

Friday January 27, 2012
8:30 am to 5:00 pm

LOCATION:

Dentistry In Aurora

520 Industrial Parkway South
Suite 300, Aurora, ON

Map available at www.dentistry-holistic.com

PROGRAM:

8:30 am – 9:00 am

(Boardroom)

Arrival and welcome

9:00 am – 10:00 am

(Boardroom)

Review of light theory and composite resin technology.
Light reflection, refraction & transmission.

10:00 am – 12:00 pm

(Boardroom)

Hands-on workshop learning how to use the ENA HRI Composite Resin System on models. Layering techniques mimicking the enamel and dentin layers to achieve invisible Class I,II, III, IV & V restorations and resin veneers.

12:00 pm – 1:00 pm

(Boardroom)

Lunch break and discussion

1:00 pm – 2:00 pm

(Boardroom)

Hands-on workshop learning how to use the ENA HRI Composite Resin System on models. Layering techniques mimicking the enamel and dentin layers to achieve invisible Class I,II, III, IV & V restorations and resin veneers.

2:00 pm – 4:00 pm

(Treatment rooms)

Clinical applications

Develop your clinical skills on live patients using the techniques covered today under natural daylight conditions in a real operatory setting.

4:00 pm – 5:00 pm

(Boardroom)

Wrap up with a review of the day
Questions and Answers

HOW TO ACHIEVE SUPERB ESTHETICS WITH COMPOSITE RESIN:
